From idea to a working system.

We build digital products and connect people, code and AI in a clear working process.

Homio / Agrobazar / Vezdevoz

Product. AI. Launch.

01 **Product engineering**

Web services, mobile apps and platforms. Architecture and interfaces, integrations and ongoing development.

02 **AI & workflows**

Bring AI agents into your team’s work. Connect tasks, data and tools with explicit checks and release controls.

03 **Infrastructure & launch**

Deploy applications and connect environments, access, builds and observability in an understandable operating process.

Homio

Real estate. One connected workflow.

A platform connecting developers and agencies: projects and materials, CRM, enquiries, meetings, viewings and transactions.

Web platform / Product interfaces / Integrations & workflows

HOMIO.PRO

https://homio.pro/en

Agrobazar

A digital marketplace for agriculture.

An agricultural classifieds platform for buying and selling produce, from vegetables and grain to machinery.

Marketplace / Catalogue & search / Web interfaces

https://app.agr.kdigital.pro/

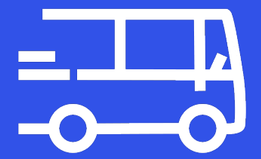

Vezdevoz

A city in motion. Transit on the map.

A passenger app with public transport routes and services, vehicle tracking on a map and favourite routes.

Flutter application / Maps & location / Transit data

https://vezdevoz.ru/

Flutter / Maps / Mobility

A path from task to outcome.

A clear path from a task to a working outcome. Every stage has an owner, a defined result and a check before the next step.

Product	Understand > Design > Build > Verify > Launch
AI workflows	Map the process > Connect tools > Configure agents > Add checks > Hand over
Deployment	Prepare > Deploy > Observe > Verify the release > Operate

Let’s work it out.

Tell us what you want to launch or change. We’ll find a clear place to start.
